

**Maximize production with
Monty's Hemp Pro products.**

Use **Hemp Pro Starter (and Calcium Plus)** at planting to establish your crop.

Use **Hemp Pro Early Vegetative** and **Late Vegetative** products during the growing season for vigorous, stress-resistant plants.

Hemp Pro Bloom & Flower is ideal to maximize flower production during the reproductive growth stage.

“

"I have recommended adding Monty's starters for a while now. It really makes a difference. The hemp growers that have used Monty's products have all been very pleased with their results. It is a product line that I can suggest with confidence." Tommy Thompson, TFC Field Sales Rep

”

Monty's offers a line of great products and unmatched customer service to its hemp farmers! Farmer first!

**MONTY'S
HEMP PRO™**

**Proven quality
products for today's
hemp professionals**

Monty's products have been used by hemp growers across the country with great success. Monty's offers specific products to maximize hemp production. These are products you can utilize with confidence throughout the growing season – from pre-planting to harvest.

All Monty's Hemp Pro™ products:

- ✱ Contain Monty's proprietary formulations
- ✱ Can be applied foliar, overhead, or thru drip
- ✱ Are low salt and pH balanced
- ✱ Are safe and easy to apply
- ✱ Will not burn and are non-corrosive.
- ✱ Are readily available for rapid plant response
- ✱ Can be applied with most herbicides, pesticides, and fungicides

Hemp Pro Active Ingredients

Hemp Pro – Starter 5-16-12

Total Nitrogen (N)	5%
Available Phosphate (P ₂ O ₅)	16%
Soluble Potash (K ₂ O)	12%
Iron (Fe)	0.30%
Zinc (Zn)	0.05%

Hemp Pro – Early Vegetative 7-9-5

Total Nitrogen (N)	7%
Available Phosphate (P ₂ O ₅)	9%
Soluble Potash (K ₂ O)	5%
Sulfur (S)	4.5%
Iron (Fe)	0.20%
Zinc (Zn)	0.5%

Hemp Pro – Late Vegetative 10-8-4

Total Nitrogen (N)	10%
Available Phosphate (P ₂ O ₅)	8%
Soluble Potash (K ₂ O)	4%
Sulfur (S)	3%
Iron (Fe)	0.45%
Zinc (Zn)	0.4%

Hemp Pro – Bloom & Flower 3-15-16

Total Nitrogen (N)	3%
Available Phosphate (P ₂ O ₅)	15%
Soluble Potash (K ₂ O)	16%
Iron (Fe)	0.30%
Zinc (Zn)	0.05%

Monty's Hemp Pro Products:

Make Monty's products part of your complete fertility and crop management program.

Hemp Pro™ Starter (5-16-12) is ideal for quick emergence and early season vigor. It is a versatile liquid plant food that can be used at planting and as a foliar, enhancing plant development from germination to early vegetative.

Hemp Pro™ Early Vegetative (7-9-5) is a foliar applied liquid fertilizer containing N, P, K with Sulfur, Iron, and Zinc. It is specifically formulated to deliver readily available nutrients during the vegetative growth stages to enhance growth and root development.

Hemp Pro™ Late Vegetative (10-8-4) increases plant growth with our unique blend of NPK and micronutrients. Its balanced blend helps boost the hemp plant's ability to maximize nutrient uptake & plant development.

Hemp Pro™ Bloom & Flower (3-15-16) is for application during reproductive/bloom stages. It is specifically designed to maximize hemp plant performance during bloom stage.

For complete application instructions, refer to the Hemp Pro Application Protocols, Hemp Pro product labels, or contact your representative.

Available in 2.5, 30, 275 gallon – and bulk sizes. For more information on these and other Monty's products contact your Monty's sales representative, call 800.978.6342, or visit www.montysplantfood.com

Other Monty's products that can be used in hemp production:

CALCIUM PLUS™ provides chelated calcium directly to the plant. Calcium has been shown to aid in developing improved cell function and strength which may improve standability and nitrogen utilization.

MICROHANCE® contains six important nutrients including Nitrogen. It offers a unique blend of Monty's technology designed to provide nutrients to the plant at any stage of growth, helping maximize the plant's yield potential.

CoMoB is a unique blend of micronutrients geared for maximizing plant growth. Cobalt is important for growth and metabolism. Molybdenum supports Nitrogen fixation in legumes. Boron supports plant structure.

NAUXIN™ offers a unique blend of Monty's technology that is designed to provide nutrients to the plant at any stage of growth, helping maximize the plant's yield potential.

K28™ LIQUID POTASH is a 28% potassium supplement for hemp plants. It is nearly pH balanced and can be safely added to nitrogen solutions, and most herbicides and fungicides, for foliar application.

AGRI-SWEET™ is refined sugar. It is an excellent food source for soil microbes and helps enhance the release of soil nutrients through microbial activity.

BIO-STRAIN® is a unique package of microbial strains designed to promote early root development, plant stamina, and the overall health of the crop throughout the growing season.
